IFS PEAKS CHALLENGE  
UK

Thu 09 Jul - Sat 11 Jul 2026

## In aid of IFS Foundation

09 Jul - 11 Jul 2026

### 3 DAYS | UK | CHALLENGING

Challenge yourself to complete a skyline loop of the Edale Valley, taking in the Peak District's highest hill – Kinder Scout.

Set in the stunning heart of the UK's first National Park, you'll be fully supported by our friendly and fun mountain leaders who will encourage you every step of the way. We'll tackle the peaty moorland paths of Kinder Edge, encounter curious gritstone formations and celebrate on the summit of Kinder Low, all the while knowing that each step we takes goes towards helping break the poverty cycle in rural Sri Lanka.

- Trek Kinder Scout – the Peak District's highest hill
- Complete a 10 mile skyline loop of the beautiful Edale valley
- Tackle the Dark Peaks' most dramatic edge
- Enjoy fantastic views across the UK's first National Park
- Raise vital funds for the IFS Foundation

## YOUR CHALLENGE DAY BY DAY

### DAY 1 Thu 09 Jul

-

#### Arrival

Your weekend will begin on Thursday night by meeting your challenge leaders and the rest of the group for your pre-challenge welcome and safety briefing at The Rambler Inn ([www.theramblerinn.co.uk](http://www.theramblerinn.co.uk)).

Accommodation is your responsibility.

---

### DAY 2 Fri 10 Jul

-

#### The Challenge

It's an early start that begins with a steep uphill climb to join the spectacular skyline path on Kinder Edge.

We'll traverse the broad edge of Kinder Scout, trekking on peaty moorland paths, encountering the curious gritstone maze of the Woolpacks and enjoying the views on the summit of Kinder Low.

Leaving the traditional descent route behind, we'll instead take a quieter route that continues further round the stunning skyline edge of the Edale Valley, taking in the extra summit of Brown Knoll before heading back down to Edale for a celebration meal provided by IFS.

Accommodation will be provided by IFS at The Rambler Inn for the night.

**Please note: Kinder Scout is a broad plateau and does not have a clear summit. We will be summiting at the far clearer summit of Kinder Low (633m). The peat 'moonscape' of Kinder Scout is currently being restored and so it is important that we stick to the footpaths to help preserve this unique and important landscape.**

**Charity Challenge reserve the right to make any amendments necessary to this itinerary. Precise timings during the challenge may vary depending upon things such as weather, and the group's ability etc.**

---

### DAY 3 Sat 11 Jul

-

#### Return

After one final night's accommodation, you are free to depart.

---

### Minimum sponsorship

Raise a minimum of **£400.00** for the IFS Foundation.

#### What's included?

##### Before you go

- Sponsorship forms
- Support materials (itinerary, kit list, visa information, travel tips, responsible travel policy and guidance)
- Members only benefits and discounts at a wide range of clothing and equipment suppliers including Outdoorhire, Cotswold Outdoor, Runners Needs, Snow + Rock, Water to Go, The Altitude Centre, Sporttape and Nomad & MASTA.
- A-Z of fundraising ideas
- Access to your own password protected account including support materials and training schedules
- Risk assessment and emergency management planning
- Public liability insurance
- Access to training weekends (optional and at additional expense)
- 16 and 20 week trek/bike training schedule
- Fitness training notes
- Sponsorship forms (online and hard copy)
- Fundraising advice

##### On your challenge

- Full back-up support including first-aid qualified staff and first-aid supplies
- Entrance fees to national parks or other places of interest visited on the itinerary
- Accommodation before and after the challenge (provided by IFS)
- Charity Challenge buff, medal and certificate
- UK-based 24-hour emergency support line
- An English speaking first aid trained challenge leader and full local support team
- All challenge management before, during and post event

#### What's not included?

##### Before you go

- Travel to and from the challenge start/finish point

##### On your challenge

- Any other specific items listed as not included in your Trip Notes

#### The details

##### Typical group size

The typical group size is 30 - 50 participants

### Why book with Charity Challenge?

- We are a multi-award winning challenge events specialist with over 25 years of professional experience organising and leading challenges worldwide
- High quality route design that incorporates major landmarks and undiscovered highlights
- Fully supported walking challenge.
- The very best leaders, who are fully qualified, highly experienced, knowledgeable and fun. They will do everything to help you complete the challenge and have a great time doing it!
- Thorough safety management systems in place (Challenge Safe)
- Engraved medal at the finish
- The very highest quality Kinder Scout Challenge on the market!

### Level of difficulty

The Kinder Scout Challenge is graded as challenging. This is the perfect challenge for participants who are of an adventurous spirit and an open mind.

- You will walk approx. 10 miles with approx. 595m of ascent.
- The terrain is a mix of peat and stone paths and tracks with very small amounts of walking on tarmac roads at the beginning and end of the route.
- You will need to be self-sufficient when out on the hill. There are no resupply points during the route.

### Training

Our challenges are long, sustained events and cover varied terrain. They require a good to high level of fitness and you should not underestimate the importance of training beforehand. Even if you are active and exercise regularly, it's good to adapt your training towards your chosen challenge. This is vital in building strength, cardiovascular stamina and muscle endurance for the endurance challenge ahead.

We recommend you start training as early as possible, ideally at least 4-6 months before your challenge. Make sure you check the distance, ascent and terrain of your challenge and create a training plan that builds up to this. Whilst you could start with short walks in your local area, it's important to build up towards walking the distance of your actual challenge and being out and active for several hours at a time. Make sure you also check the type of terrain your challenge will take place in and plan your training to include similar terrain. Whilst an hour in the gym can help, you should ideally be training in a similar environment to that of your actual challenge and for several hours at a time.

For challenges that involve steep terrain such as hills or mountains or even the coast, make sure you have training days that include similarly steep sections. Building up the muscles for both ascents and descents is important and can make all the difference in enjoying your final challenge. It is normal for knees to ache when building these muscles up and we would highly recommend training with walking poles to help ease the pressure on your knees. Make sure you set up your walking poles so they're a good length for you first – most outdoor stores will be able to advise on this and there are plenty of tutorials available online.

Training with the kit you will be using on your challenge is important so you can test it out beforehand and make sure it's fit for purpose. This includes wearing in any walking boots or shoes and experimenting with the socks you wear so you don't get blisters on your challenge. Make sure you also get used to walking with a backpack with at least 2 litres of water in. It's very important to test out your waterproofs (both jacket and trousers) in the rain as there's nothing worse than finding out your waterproofs leak 2 hours into your challenge!

A healthy balanced diet is as important as your physical training. Make sure you fuel up on energy giving carbohydrates and muscle-repairing proteins before a long training session and test out the snacks you plan to take on your challenge as you walk. Not everyone gets on with energy gels, but most people can benefit from a slow energy release banana or a quick sugar hit from a jelly baby!

We provide plenty of additional information and guidance in your personalised login area, including warm up, stretching, cardiovascular training, exercise intensity, cross training, resistance (weight) training, cool down and the hazards of over-training.

### Group size

Our minimum group size is 40 and the maximum is 50. There will be approximately one mountain leader per 12 participants.

### Group management

This is a leader-led challenge and you will be accompanied by our challenge leaders at all times.

We employ experienced and fully qualified walking leaders to accompany and lead you. The leaders are first aid qualified and have extensive experience in leading challenges throughout the UK. They will be ultimately responsible for the running of the itinerary and the safety of your group. They will be carrying safety equipment and first aid kits with them at all times.

This challenge is designed and run as a team event and we encourage everyone taking part to support each other throughout the trek. This challenge is not designed as a race for individuals.

Partway into the challenge you will have begun to spread-out into your natural walking speeds. For larger groups, once you reach the first 'checkpoint' you may be allocated into a small group and designated a walking leader. These leaders will then be responsible for your safety. If you have any problems or need to join a faster or slower moving group, then please speak to your leader.

If you wish to walk together with friends, colleagues, family etc then this is no problem. Please just ensure that you all keep together and reach the checkpoint at the same time so that we can ensure you all get allocated together.

Your leaders will be aware of several important cut-off times at locations that we need people to reach by a certain time so the group can complete the challenge. This gives everyone plenty of time to complete the challenge. Your leaders will manage the group pace and keep you informed about these and your options if they think you might be struggling to achieve these times. In certain situations, you may be asked to descend early. You will be accompanied by a leader should this happen. We ask everyone to respect the leaders' decisions. They are made with the group's safety in mind.

Please note that this route will not be marked by event arrows, nor is the event designed as an event for individuals to race. It is designed to be a team event, with like-minded people, all raising money for charity, supporting each other throughout the challenge.

## Weather

### Weather, safety and decision-making

The weather in the UK can be unpredictable, particularly in mountainous and exposed areas. Charity Challenge plans for adverse weather on all UK challenges and closely monitors forecasts in the lead-up to, and during, each event.

We use the **Met Office weather warning system**, alongside specialist forecasts where appropriate (such as mountain weather forecasts), and live assessments by our experienced Event Managers and challenge leaders.

### How we use Met Office weather warnings

- **Yellow weather warnings** indicate that conditions may be challenging. Events will usually go ahead, with leaders managing conditions on the day and making adjustments where required. Rain alone rarely results in changes to our challenges.
- **Amber weather warnings** indicate a higher likelihood of severe weather and increased risk. This may result in significant route changes, altered timings or, in rare cases, postponement or cancellation if safety cannot be assured.
- **Red weather warnings** indicate dangerous conditions and events will not proceed.

Where thunder and lightning are forecast or observed, we follow a strict safety protocol. Challenges will not begin, or will end immediately, until it is safe to proceed.

### How decisions are made

All weather-related decisions are made by Charity Challenge's **Event Manager in consultation with the leadership team**, using forecast information and real-time conditions on the ground. Participant safety is always the overriding priority, and leaders' decisions on the day are final.

Decisions around route changes, delays, early finishes or cancellation are based on the **expected weather conditions at the challenge location and along the event itinerary**.

Challenges will **not** be cancelled, postponed, or refunded solely due to severe weather warnings in a participant's local area or place of departure if conditions at the challenge location allow the event to proceed safely.

Unless Charity Challenge cancels or postpones an event, refunds or transfers are not available due to weather or travel disruption, in line with our terms and conditions.

## Terrain

The majority of this challenge takes place using hill paths within the Peak District, which, although uneven underfoot, are fairly well maintained and regularly used. However, there is significant erosion of the peatland in places so we encourage you to stick to the footpath and follow the advice of your challenge leaders.

## Challenge timings

You will need to arrive at the accommodation by 5pm.

The challenge will start at approx 9am. We expect the challenge to take between 5-6 hours to complete, and we aim to have everyone finished by 2-3pm.

Please note that due to the nature of this challenge, changes may happen that delay the finish time.

**Please note: Precise details and timings will be made available in your Final Details that are sent out one month prior to the challenge.**

### Getting to and from the challenge

**We will confirm all of your 'Final Details' one month prior to the challenge.**

The base for your challenge is The Rambler Inn ([www.theramblerinn.co.uk](http://www.theramblerinn.co.uk))

### Accommodation

Accommodation for the challenge is your responsibility.

The base for your challenge is The Rambler Inn ([www.theramblerinn.co.uk](http://www.theramblerinn.co.uk)).

### Food and drink

A packed lunch will be available to you during the trek. We would advise that everyone also bring some of their own snacks and at least 2 litres of water to keep them going during the day.

IFS will be providing dinner the night before the challenge. On the challenge day they will also arrange breakfast and a celebration meal.

We advise you to bring enough bottles to ensure you have 2 litres of water on you at all times. We would encourage you to also bring some of your own preferred snacks to keep you going during the challenge.

Please ensure you have had a substantial breakfast before arriving and that you arrive with your water bottles already filled.

If you have a severe allergy or dietary need, such as a severe nut allergy, please ensure you provide as much detail as possible about this when booking on the challenge (e.g. whether you need an epipen, whether it is an airborne allergy or not etc). If you have informed us of any allergies or special dietary needs as part of the challenge booking process, we will endeavour to ensure appropriate meals and checkpoint snacks are available to you. However, we would encourage you to also bring your own favourite snacks with you to ensure your energy levels stay topped up throughout the challenge. Please be aware that it may not always be possible for us to cater to special dietary or allergy needs – we will get in touch if this is the case.

## Clothing and equipment

This is a tough challenge and to give yourself the best chance of successfully completing it please make sure that you have consulted the kit list carefully and that you have all kit marked as essential. No spare kit will be provided on the challenge.

### Footwear

The most appropriate footwear for this challenge is a pair of walking boots.

Walking boots provide more ankle support than shoes and can help protect you from ankle twists and sprains. They also have much better grip than your average sports trainer. Boots generally have stiffer soles that can better protect your feet from rough and rocky terrain, providing more comfort when you're walking on uneven terrain for any length of time. In bad weather, walking boots can also keep your feet drier and warmer.

Many people prefer to wear a trail shoe instead of boots as they find that they are lighter and more comfortable. Trail shoes are fine to wear, but please make sure that they have good grip on the soles. Sports trainers are not appropriate on any of our non-urban challenges.

If you are buying new footwear, it is important that it is the right fit for your feet. We recommend seeking advice from your local outdoor retailer and trying several different brands and models out to find the pair that you find most comfortable. Remember to check how waterproof they are.

It is particularly important that you make sure that your footwear is well worn in, that you have tested them out with suitable walking socks and that you have any blister plasters that you may need.

### Waterproofs

As the weather can change quickly in the UK, it is important to make sure that you bring an appropriate waterproof jacket and waterproof trousers. Make sure you test these out before your challenge to check they can keep you dry for several hours at a time – you don't want to find out your waterproof jacket leaks partway into your challenge!

### Walking Poles

We highly recommend bringing walking poles to help you look after tired knees on steep ascents and descents. Your leaders will be happy to show you how to use them on the challenge, or you can check online in advance for videos on how to set them up for your height and the best way to use them.

### Personal First Aid

Your leaders will carry an appropriate group first aid kit on the challenge, but it is a good idea to bring personal first aid items along for yourself. These may include blister plasters or physio tape, any personal medication and any knee or ankle supports.

If you carry an epipen, please make sure you bring two and that your leaders know where they are kept.

You will also need to consider bringing clothing and kit appropriate to the weather on the day of your challenge.

Remember that the weather and temperature on the hilltops can vary significantly from that in a valley. This may mean bringing hats and gloves as well as extra layers to keep you warm. Or it may mean bringing a sunhat, suncream and extra water. On some challenges, it will mean bringing kit for all weathers!

Once you book you will have access to kit discounts with our partners OutdoorHire and Cotswold Outdoor.

Please be aware that because of the environment that this challenge takes place in our leaders may ask to see the vital parts of your kit. Participants found without kit marked on the kit list as essential may not be allowed to take part in the challenge.

### Toilets

There are public toilets both at the start and end of the trek.

Where public toilets are not available then toileting is available in the great outdoors! Please make sure to follow the countryside code and take all litter, including tissues and toilet paper, home with you.

### Money

During the challenge, there are limited opportunities to spend any money. We would advise you should need no more than £20.00, excluding your joining and returning home travel costs.

### Safety

Charity Challenge considers the safety of all of our participants and staff to be a top priority, and as such we have set up 'Challenge Safe', a thorough safety management system. 'Challenge Safe' formalises our ethos when it comes to safety, and brings together the procedures and risk management strategies that we use to audit all aspects of our challenges, from vehicles to accommodation to the challenge activity itself. Your welfare is absolutely paramount!

Here are a couple of important points that you should be aware of:

- The terrain on the challenge is often muddy and rocky and in wet conditions can be extremely slippery. Please make sure that your walking boots have good grip. Trainers are not appropriate as they lack grip.
- The weather on the summits of the hills can be very different to down in the valleys. Please make sure you carry an additional warm layer, waterproof jacket and trousers and a hat and gloves.
- The ascent onto Kinder Edge is steep and requires concentration.
- The route is remote with no access to top up water bottles or snacks. Ensure that you bring enough to last the day with you, so you can keep your energy levels up and keep yourself hydrated by drinking lots of fluids.

### Emergencies

Your leadership team is trained to deal with emergency situations in remote areas and will be carrying mobile phones and radios in case the emergency services need to be contacted. The event is not run as a race and you will never be encouraged to walk at a pace 'beyond your ability'. There will always be a wide variety in people's walking abilities

which will be carefully managed by the leader team. This team will keep the group together for maximum safety and set a sensible pace for all to achieve this challenge within the planned time frame. Should you find yourself unable to continue for any reason, then our support team, including our support vehicle, will be able to assist you coming off the challenge. Emergencies will be coordinated with the local Search and Rescue service.

### Pre-Existing Medical Conditions

We do not professionally vet your medical details. Please assess for yourself whether you are fit and able to take on the challenge. Please review the detailed Trip Notes and itinerary to get a better idea of what is involved. Please speak to your doctor or specialist if you have any concerns about taking part. If you think that there are things we can do to make the challenge more accessible/comfortable for you, it is your responsibility to let us know, and we will then let you know if we can accommodate your request.

### Medical Support

First Aid qualified staff will be provided with the medical details that you give on your booking form but please note that they are on the challenge to support with medical matters related to the challenge environment and terrain itself, i.e. heat/cold and so on. They will deal with any incidents and accidents (cuts, sprains, breaks and so on). They are not intended to continue any ongoing specialist medical care that you receive in the UK for pre-existing medical conditions, and should not be assumed to have any professional experience of your specific medical condition.

If you have any specific needs around pre-existing medical conditions, you should discuss these with your family doctor or specialist in advance and then discuss any advice given by them with the challenge leader.

### Responsible tourism

Charity Challenge believes that all of its challenges, whether in the UK or overseas, should have a positive impact on the communities we visit. We are committed to sustainable and responsible tourism and always aim to make sure that we minimise our impact on the local environment.

You can help us to achieve this goal by:

- Adopting a policy of 'leave no trace'. You can read more about this [here](#).
- Taking all litter off the trek with you, including fruit peels and skins.
- Using public toilets when available and taking any tissues from 'wild wees' home with you.
- Stick to the footpaths at all times and avoid walking on their edges, to help prevent erosion from spreading.
- Only using the car park(s) designated for your event, and not parking on the local streets.
- Keeping noise to a minimum when passing houses in residential areas.
- Refraining from bringing glowsticks with you on our night challenges. This prevents them from becoming litter on the mountains when they are dropped.
- Leaving rocks, plants and other natural objects as you find them. Please don't take these home with you.
- Avoid transporting and introducing invasive species by cleaning your outdoor gear regularly.
- Contributing to the local economy by paying for parking, staying an additional night in the local area or enjoying a local meal out.
- Being patient and understanding if at points you have to wait or slow down due to others being on the same path.

We ask you to think carefully about any memorial type activities you may plan for your challenge. We fully appreciate the emotional importance our challenges have for many of our participants and encourage you to mark that special moment in your own way, whilst ensuring that the natural beauty and protection of the environment you're in is maintained. Leaving photos or other memorabilia or writing on stones is contrary to the leave no trace principle. Remember: 'Take only memories, leave only footprints'.

For more details about our responsible tourism policy then please click [here](#).
